

MOHAMED ADEL METOLY

FULL STACK DEVELOPER

El-Maadi, Cairo, Egypt | +201065732917 | m01001145780@gmail.com | linkedin.com/in/mohamed-adel-537368220

PROFESSIONAL SUMMARY

Highly motivated and detail-oriented Full-Stack Developer Trainee with a solid foundation in Electronics and Communications Engineering. Passionate about building scalable enterprise web applications, leveraging comprehensive knowledge in Java, Spring Boot, and Angular. Proven ability to design secure backend architectures and responsive user interfaces, committed to writing clean, maintainable code and solving complex technical challenges.

TECHNICAL SKILLS

Programming Languages: Java (11/17), TypeScript, JavaScript, SQL.

Web Technologies & Frameworks: Spring Stack (Spring Boot, Spring Data JPA, Spring Security), Angular, Hibernate, HTML5, CSS3.

Databases & Tools: PostgreSQL, MySQL, JWT, OAuth 2.0, Git, GitHub.

Core Methodologies: Object-Oriented Programming (OOP), Data Structures & Algorithms, RESTful API Design.

SOFT SKILLS & COMPETENCIES

Fast & Continuous Learning: Highly adaptable and skilled at quickly mastering new technologies, programming libraries, and full-stack frameworks.

Effective Communication & Eloquence: Strong verbal and written communication skills, with the ability to articulate technical concepts clearly to both technical and non-technical teams.

Problem-Solving & Critical Thinking: Analytical mindset focused on troubleshooting complex coding challenges, bugs, and architectural issues.

Teamwork & Collaboration: A collaborative team player who thrives in cross-functional environments and shares knowledge effectively.

Time Management & Organization: Proven ability to manage learning schedules, balance academic milestones, and deliver personal projects on time.

KEY PROJECTS

E-Commerce & Inventory Management Platform (*Full-Stack Project*)

- Developed a fully functional E-commerce platform utilizing Spring Boot for the backend and Angular for the frontend.
- Implemented secure user authentication and authorization using JWT and Spring Security, protecting endpoints based on roles (Admin/Customer).
- Designed a relational database schema using PostgreSQL managed via Spring Data JPA and Hibernate to handle products, orders, and user carts.

Task Management & Collaboration Tool (*Full-Stack Project*)

- Built a dynamic task management web application tailored for Agile teams using Angular and TypeScript.
- Engineered robust RESTful APIs in Java to support complete CRUD operations for tasks, categories, and user assignments.
- Optimized database communication and structured efficient queries to ensure fast data retrieval and state management.

Digital Wallet System Simulation (*Backend-Focused Project*)

- Architected a secure backend system simulating online monetary transactions and balance updates using Spring Boot.
- Integrated strict authorization protocols with OAuth 2.0 to secure financial endpoints and user transactions.
- Applied core Data Structures and Algorithms to handle efficient queuing and transaction histories securely.

PROFESSIONAL EXPERIENCE

Java Full-Stack Developer Trainee

Self-Learning & Academic Projects

Cairo, Egypt

- Develop and design full-stack web applications utilizing Java, Object-Oriented Programming (OOP), and robust Data Structures.
- Implement enterprise backend solutions using Spring Stack (Spring Boot, Spring Data JPA) and Hibernate.
- Architect and optimize relational database designs using SQL technologies.
- Build responsive user interfaces by leveraging Angular, TypeScript, JavaScript, HTML5, and CSS.
- Integrate secure authentication and authorization protocols including JWT and OAuth 2.0.
- Execute end-to-end development of academic and personal projects to ensure clean, scalable, and maintainable code.

EDUCATION

B.Sc. in Electronics and Communications Engineering

Faculty of Engineering, Fayoum University

Cumulative Grade: Very Good (81%)

LANGUAGES

Arabic: Native / Mother Tongue

English: Very Good
